**DETAILED ACTION**

1. Claims 1-51 have been presented for examination.

**Election/Restrictions**

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to design data generating apparatus/method utilizing transformation of allocated shapes, classified in class 703, subclass 1.
  - II. Claim 12-51, drawn to design data generating apparatus/method utilizing transformation of allocated shapes by movement of edge lines as well as cross sectional shape analysis, classified in class 703, subclass 1.

Inventions listed in Groups I-II above are directed to related with respect to the execution of probabilistic distribution estimation. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed require distinct shape transformations and analysis in order to implement the grouped claims.

Group I requires a nodal shape transformation using boundaries and regions, Group II requires nodal shape transformation using cross-sectional shapes as well as similarity like transformations.

The claims would require distinct searches in order to encompass the distinct and different shape transformations and analysis. Furthermore, the inventions as claimed do not encompass overlapping subject matter with respect to the transformations and analysis employed and there is nothing of record to show them to be obvious variants. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
